Wait! Are you saying that the electricity producers, after neglecting to winterize their operations, are now allowed to price gouge the consumers that they not only let down, let freeze, and in some cases let die???

I just found out that my local utility, Georgetown Utilities, is going to have to take out a 10-year loan for 48 million dollars to pay for this price gouging!!!! I haven't heard one executive of any power producer in Texas even breath a word of saying they are sorry.

Are you of the Public Utilities Commission going to just let the people of the State of Texas be raped and pillaged in this God-awful way? I read that the PUC says they can't reverse it because it is too "complicated." We hear the Governor say on TV that you are, "Going to investigate this and get to the bottom of it." This isn't complicated. It doesn't take a big investigation. We are at the "bottom of this."

What the people of Texas need is someone in the governor's office and the PUC to take action to protect us consumers. We don't need platitudes. We need someone to STOP THE STEAL!
